

INDUSTRIAL PLANT and EQUIPMENT RELIABILITY GROWTH and MAINTENANCE TRAINERS

Five-Star Training for Lower
Equipment Operating Costs &
Higher Equipment Reliability

The Five-Star Provider For Equipment Reliability Growth And Maintenance Training

Heaps of Benefits and Value

You get a lot of benefits from using General Training for all your equipment maintenance and reliability training:

- All industrial asset management, reliability growth and maintenance training throughout your operation is by **one provider**
- We handle **all training logistics**, document printing and course organisation
- **We create special courses to your requirements**
- The same information, knowledge and message is **delivered consistently** to everyone
- All training documentation is **prepared free** by us*
- All our documentation can be **used without restriction** in your company
- Courses are delivered on-site or at a central location to **suit your circumstances**
- Course content is developed to meet your needs – from **highly technical to general** coverage
- Each course is delivered by people **deeply knowledgeable** in the topic
- **Attendees are engaged** through hands-on activities, group discussions and team problem-solving
- **Assessment and certification** is available
- **National accreditation** for training can be developed

**conditions apply, please ask for details*

Take Your Operation to New Heights of Performance

Develop competent people throughout your organisation who are knowledgeable and **skilled in world-class**

methods of industrial plant and **equipment maintenance**, and **equipment reliability growth** and improvement.

Call us when you need best practice technical and engineering knowledge transfer to improve equipment reliability growth and to build precision maintenance know-how and skills in your workforce and management.

Let us train your executives, managers, engineers, technicians, tradesmen, operators and un-skilled personnel to know what to do to **get highly reliable operating plant and equipment**.

Our experience covers the complete life cycle of industrial plant and equipment, from feasibility to design, procurement, construction, operation and decommissioning. All course content is structured and made **relevant to the people attending** the course.

We develop and deliver all forms of maintenance and reliability growth training for project engineers and project managers; operations, maintenance and engineering executives and managers; plant and equipment designers, plant operators, production and maintenance supervisors, equipment repairers, equipment over-haulers, plant maintenance crews, sub-contract maintenance providers, service technicians, trades assistants, etc.

The Five-Star Trainers in Industrial Plant and Equipment Reliability Growth

Training in world-class methods of maximum equipment reliability and least operating costs for industrial plant and equipment

Optimizing Plant and Equipment Operation		Modern Enterprise Asset Management, Reliability and Maintenance Management		Advanced Operational Excellence and Work Process Efficiency	
Rotating Equipment Reliability Introduction and Advanced - 2 + 2 Days	Project and Maintenance Managers, Engineers, Supervisors Technicians, Maintainers, Operators	Maintenance Management Mastery for Zero Failures - 3 Day	Maintenance Executives, Managers, Engineers, Supervisors	Reliability Growth Cause Analysis - 1 Day	Project, Maintenance and Operations Executives, Managers, Engineers, Supervisors
Reliable Centrifugal Pumps and Pumping Introduction and Advanced - 1 + 1 + 1 + 1 Days	Project, Maintenance and Operations Managers, Engineers, Supervisors Technicians, Maintainers, Operators	Enterprise Asset Management for Maximum Profit with Least Operating Risk - 3 Day	Board Members, CEOs, Operations and Maintenance Executives, Managers, Engineers, Supervisors	Reliability and Availability Fundamentals - 2 Day	Project, Maintenance and Operations Managers, Engineers, Supervisors Technicians, Maintainers, Operators
Pumps and Compressors Course Introduction and Advanced - 2 + 2 Days	Operations and Maintenance Managers, Engineers, Supervisors Technicians, Maintainers, Operators	Maintenance Planning and Scheduling for Reliability - 3 Day	Maintenance Planners, Supervisors and Technicians	Best Practice Machinery Care and Maintenance for Operators - 1 Day	Maintenance and Operations Managers, Engineers, Supervisors Technicians, Maintainers, Operators
Vibration and Bearing Condition Monitoring and Analysis Introduction and Advanced - 2 + 2 Days	Maintenance Managers, Maintenance Engineers, Supervisors, Technicians, Machinery Maintainers	The Operations and Maintenance Winning Partnership - 1 Day	Operations and Maintenance Executives, Managers, Engineers, Supervisors	Introducing Total Productive Maintenance (TPM) - 2 Day	Maintenance and Operations Managers, Engineers, Supervisors Technicians, Maintainers, Operators
Precision Shaft Alignment Training - 1 Day	Maintenance Engineers, Technicians, Maintainers	Root Cause Failure Analysis RCFA - 2 Day	Project, Maintenance and Operations Managers, Engineers, Supervisors Technicians, Maintainers, Operators	Lean and Six Sigma Process Improvement Methods - 1 + 1 Day	Project, Maintenance and Operations Managers, Engineers, Supervisors
Fundamentals of Condition Monitoring - 2 Day	Maintenance Managers, Engineers, Supervisors Technicians, Maintainers, Operators	Failure Mode Effects and Criticality Analysis FMECA - 2 Day	Project, Maintenance and Operations Managers, Engineers, Supervisors	Introducing Precision Maintenance and Precision Equipment Installation - 1 + 1 Day	Project, Maintenance and Operations Managers, Engineers, Supervisors
